G95 PALLET INVERTER

The G95 Overview:

The G95 unit is a simple ground loaded pallet transfer or freezer slat removal system. The G95 is ideal for frozen or temperature cautious product applications including meat, seafood, poultry, vegetables, condiments, and more.

Our equipment is used in day to day operations looking to reduce labor or improve in-house handling flexibility.

Uses include:

- Recovery of broken pallets
- Simple transfer of in-house or export pallets
- Removal of blast freezing spacers, slats or dividers
- Chep, iGPS, Peco and other rental pool handling issues
- Maximize railcar shipments

Standard Features:

- Jaw openings available up to 118 inches
- Up to 95 degree tipping angles
- Gravity and powered skate table as standard for product separation
- 3,300 lb and 4,400 lb capacities are standard
- Available with lever controls, push buttons or custom controls
- Floor loaded from two sides via pallet jack or walkie truck
- Small foot print to accommodate space issues
- Stainless steel or other finishes available
- Energy efficient electrical package
- 24 volt operator safe controls
- Multiple environment packages including, low temperature and wash down capable
